

Global Weather Repository - Data Dictionary

Column Definitions

country (Text) - Country where the weather observation was recorded

location_name (Text) - City or observation location

latitude (Decimal) - Latitude coordinate

longitude (Decimal) - Longitude coordinate

timezone (Text) - Location timezone

last_updated (Date/Time) - Date and time of observation

temperature_celsius (Decimal) - Temperature in degrees Celsius

condition_text (Text) - Weather condition description

wind_kph (Decimal) - Wind speed in km/h

wind_direction (Text) - Wind direction

pressure_mb (Decimal) - Atmospheric pressure

precip_mm (Decimal) - Precipitation in millimeters

humidity (Integer) - Relative humidity (%)

cloud (Integer) - Cloud cover (%)

feels_like_celsius (Decimal) - Apparent temperature

visibility_km (Decimal) - Visibility in kilometers

uv_index (Decimal) - UV index

air_quality_Carbon_Monoxide (Decimal) - Carbon monoxide concentration

air_quality_Ozone (Decimal) - Ozone concentration

air_quality_Nitrogen_dioxide (Decimal) - Nitrogen dioxide concentration

air_quality_Sulphur_dioxide (Decimal) - Sulphur dioxide concentration

air_quality_PM2.5 (Decimal) - PM2.5 concentration

air_quality_PM10 (Decimal) - PM10 concentration

air_quality_us-epa-index (Integer) - US EPA air quality index

sunrise (Time) - Local sunrise time

sunset (Time) - Local sunset time
